

DEMYSTIFYING TOP 5 CLOUD MIGRATION MYTHS

1

ON-PREMISE INFRASTRUCTURE IS MORE SECURE THAN CLOUD

REALITY

In an on-premise IT infrastructure, security is predominantly focused on protection against external threats. However, in the cloud, protection is more holistic as it can be updated, audited, and secured in a more complete way than was possible with the physical nature of the pre-cloud environment.

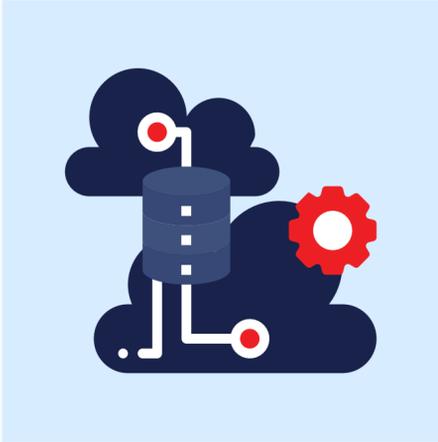

2

MIGRATION IS A LENGTHY AND ARDUOUS PROCESS

REALITY

Well, this cannot be entirely a myth. Of course, migrating from one system to the other requires much time and effort. However, once the migration is done an organization can reap many benefits, such as data storage, computing, and analytics. Aside from these, a variety of business benefits including faster deployment, better mobility and easier collaboration for the workforce, better data security, and less complexity in infrastructure can be found with a cloud platform.

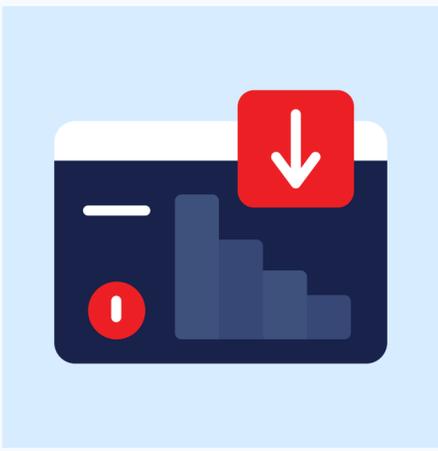

3

CLOUD MIGRATION CAUSES BUSINESS DOWNTIME

REALITY

With careful planning and the skills of an experienced cloud migration specialist, you can fully embrace the cloud even for your critical business applications where downtime is not an option.

4

CLOUD MIGRATION IS ONLY FOR LARGE ORGANIZATIONS

REALITY

Having your business on the cloud can help you access your IT services from any part of the world using any device. This can add benefit to your organization by improving organization and flexibility, irrespective of business size.

5

CLOUD MIGRATION MIGHT RESULT IN VENDOR LOCK-IN

REALITY

There are several ways to avoid vendor lock-in and get the most from your cloud investment before selecting any cloud service provider, such as: determine your goals, understand the capabilities of the cloud vendor in question, and see if they are a good match. Also, ensure to loosely couple your applications, so you can enjoy better interoperability.
